

A reasonable start to wildfowling out on our local estuaries

That's another season kicked off and from what I can gather a few lucky wildfowlers have added one or two Canadas to their bag returns there are also reports of good packs of duck moving around, so an encouraging start in relatively mild conditions.

No flying start for me as I was on a distant Island for 3 days trying for salmon however on my return and whilst carrying out reconnaissance Canada, pinks and greys were all spotted although in small numbers, off course the larger body of pinks and greys are all still due to arrive. The weather forecast is looking like rain not too popular with us fowlers, sometimes you just have to get on with it many a bird has been bagged in these unpleasant conditions, especially if it's windy!

Its club membership time again so you will soon be digging deep into your pockets and sending in TVWA fees to our treasurer on return post or online banking, as we all know the affiliation with BASC continues to make it a great deal with excellent Insurance and loads of info if required

That's it for this month's news report it's a busy time for us all good luck out there and stay safe!! JM
